Hello everyone,

I'm excited to share that we are rolling out ChatGPT across our entire organization, making it available to all employees as part of our ongoing efforts to enhance productivity, creativity, and efficiency.

How to access ChatGPT

You can now access ChatGPT directly through your [Okta dashboard](#). Simply log in to Okta as you normally

would and look for the ChatGPT application.

Why we're rolling this out

ChatGPT can assist with a wide range of tasks, including drafting content, summarizing information, brainstorming ideas, writing code, and more. Our goal is to empower you with a tool that streamlines your work while maintaining our security and responsible-use standards.

Usage guidelines (required reading)

Alongside this rollout, we've created a usage guide that outlines best practices and rules of engagement for using ChatGPT responsibly at O'Reilly. This includes guidance on data handling, appropriate use cases, and limitations.

Please take a few minutes to review the [usage guidelines](#) before getting started.

Key reminders

- Do not input sensitive, confidential, or proprietary information into ChatGPT unless explicitly permitted.
- Use ChatGPT as a support tool—always review and validate outputs before relying on them.
- Follow all company policies and the guidance outlined in the usage document.

We're excited to see how you incorporate this tool into your workflows. If you have any questions or run into any issues accessing ChatGPT via Okta, please reach out to the IT team via solutions@oreilly.com or slack at [#helpdesk](#).

Thank you,

Dean Roman
